Semester Lesson Plan

Subject: Business Data Analysis Class: III ^{S} B.Com A'

Sl. No.	Name of the Module	Scheduled Dates From & to	Estimated Number of Hours
1	Unit 1:- Introduction to Statistics Introduction - Meaning, Functions & uses of statistics: Collection of data - Techniques of data collection - Census Technique and Sampling Technique (Concepts). Classification: Meaning & methods of classification of data, Tabulation: Meaning parts of a table - Simple problems on Tabulation: Diagrammatic Presentation: Bar diagrams - Simple bars, multiple bars, Percentage subdivided Bar diagram: Two dimensional diagrams - Pie diagram.	9th October to 15th November	12 hours
2	Unit 2:- Measures of Central Tendency & Dispersion. Measures of central Tendency Arithmetic Mean: Calculation of Arithmetic mean for Individual discrete & Continuous series - Problems using direct method. Median: Calculation of median for individual, discrete & continuous series.	16th November to 23rd December	18 hours

Sl. No.	Name of the Module	Scheduled Dates From & to	Estimated Number of Hours
	Mode - Calculation of Mode for individual, Discrete & continuous series using inspection method (Excluding problems using grouping tables), Empirical relation between Mean, Median & Mode Measures of Dispersion :- Calculation of standard deviation & co-efficient of variation in Individual discrete & Continuous Series - Problems using Direct method. Measures of Skewness :- Calculation of Karl Pearson's co-efficient of Skewness (Uni-modal).		
3	Unit 3 :- Correlation & Regression Analysis Correlation Analysis - Meaning types of correlation, calculation of Karl Pearson's co-efficient of correlation in individual series - Problems using Direct-Method only; computation of probable error. Regression Analysis :- Meaning of regression, Estimation of X & Y Values using Regression	26th December to 17th January	12 hours
