EXISTING SYSTEM

- ✓ An existing system can provide manually paper work.
- ✓ The user has to go in the office where user can get the car on rent and book their car.
- ✓ In the existing system you cannot provide feedback of the user to the admin online.

NEED FOR NEW SYSTEM

- ✓ The new system is totally computerized system.
- ✓ A new system provides features like time efficiency to show car details, user profiles and whatever the customer will give the feedback to the admin.
- ✓ This system provides tourism and travelling facilities.
- ✓ An inquiry is easily done by user in the system.
- ✓ It is the most software application for managing online car rental business.

2 AIMS AND OBJECTIVES

Helps customer to order their food at any time. The customers will be able to order their favorite dishes at any point of time, and as we have pointed out earlier, that time is a minimal option, and restaurants must have a specified system through which they can serve a huge number of customers while making their work smoother. Ordering.co is one of the best platforms which provides all of these platforms along with numerous innovative features which has turned countless small and large businesses into an inspiring leader in the online marketplace

The main objective of this system is to manage the details of item category, food, delivery address, order, and shopping cart. It manages all the information about item category, customer, shopping cart, item category. The project is totally built at administrative end and thus only the administrator is guaranteed the access. The purpose is to build and application program to reduce the managing the item category, food customers. It tracks all the delivery address ordered

The main aim and objective of this project is to design and implement a website which consists of these basic features:

- Responsive Front-end interface
- Connection to a database for data storage
- Registering the customers
- Registering the admins
- Display the products on the website
- Enable users to filter products
- Enable the user to choose and buy desired products

ABSTRACT

The objective of project on Homeward is to developing a GUI based automated system, which will cover all the information Related to Home Rental Services. This project is developed using PHP and MySQL. This simple online project serves some features that are commonly found in other popular online sites.

In this project, we are using Visual Studio Code to mainly design the front end of the project and the back end is implemented on XAMPP Web Server. Web Server software is used to design back end mainly because we can create relational table employee database system easily; using Web Server and Visual Studio Code software, provide a good graphical user interface to the user of the system.

Abstract

Apartment Visitor Management System deals with the security provided at society premises from the unauthorized or unwanted visitors and provide entry pass to the regular visitor.

Nowadays, in most society visitor management consists of visitors scribbling their name in a paper book.

Instead, Apartment Visitor Management System will assist you the professionalized way in which you welcome your visitors. This software is a complete Visitor Management service to improve the efficiency, productivity and security.

ABSTRACT

The purpose of the project entitled as "HOSPITAL MANAGEMENT SYSTEM" is to computerize the Front Office Management of Hospital to develop software which is user friendly, simple, fast, and cost – effective. It deals with the collection of patient's information, diagnosis details, etc. Traditionally, it was done manually. The main function of the system is register and store patient details and doctor details and retrieves these details as and when required, and also to manipulate these details meaningfully. System input contains patient details, diagnosis details, while system output is to get these details on to the screen. The Hospital Management System can be entered using a username and password. It is accessible either by an administrator or receptionist. Only they can add data into the database. The data can be retrieved easily. The data are well protected for personal use and makes the data processing very fast.

ABSTRACT

As the name specifies "TOURISM MANAGEMENT SYSTEM" is software developed for managing tour booking.

Identification of the drawbacks of the existing system leads to the designing of computerized system that will be compatible to the existing system with the system Which is more user friendly and more GUI oriented. We can improve the efficiency of the system, thus overcome the drawbacks of the existing system.

- Less human error
- Strength and strain of manual labour can be reduced
- High security
- Data redundancy can be avoided to some extent
- Data consistency
- Easy to handle
- Easy data updating
- Easy record keeping
- Backup data can be easily generated

INTRODUCTION

1.1: Introduction to system

Online Railway Reservation System PHP Project. In particular, this Railway Management System Project in PHP mainly focuses on managing online train tickets.

To be more precise, the system helps to keep track of all online ticket bookings and information. Also, the system displays all the available trains and routes. In addition, the system allows adding of trains, and ticket details too. Evidently, this project contains an admin panel with an employee and passenger panel.

In an overview of this web application, passengers can simply register themselves and log into the system in order to book online tickets. He/she can view a list of available trains with their routes, fares, and others respectively. With it, passengers can book trains by selecting any.

At last, the passengers can view their tickets from the ticket section. Before anything, this whole online ticket reservation process from a passenger's account is not considered to be finalized by the system.

Gone are the days when individuals had to stand in long queues at railway stations or rely on travel agents to secure their train tickets. With the advent of the Online Railway Reservation System, passengers can now experience a hassle-free and streamlined booking process, enabling them to plan their journeys with ease.

This project leverages the power of technology and the internet to provide a user-friendly platform that caters to the diverse needs of travellers. By offering an intuitive interface, reliable ticket availability information, and secure payment

Abstract

The number of persons who are in need of blood are increasing in large number day by day. In order to help people who are in need of blood, my Online Blood Bank can be used effectively for finding the details of blood donors having the same blood group and with in the same city. With the help of my Online Blood Bank people who are having the thought of donating blood gets entered in my Online Blood Bank giving his total details.

My Online Blood Bank site is available to everyone easily. A person who likes to donate blood gives his entire details i.e., fill in the registration form and can create a username with a password by which he can modify his details if at all there are any changes in his information given.

My site also helps people who are in need of blood by giving the details of the donors by finding, if at all there are no donors having the same group and with in their own city they will provide the addresses with phone numbers of some contact persons in major cities who represent the contact persons we will give them a Mobile Link i.e., India's Largest Paging Service through which they can give the message on every ones pagers with the blood group and where they are living in, such that the donors who view the messages in their pagers having the same blood group and the in the same city, he contacts the person on phone who are in need of a blood. Such that the person gets help from us which saves his life.

The present project elucidates the following features.

- Registering the Donors
- Modification of Donor Information
- Searching a Donor
- Life Saving Contacts (in major cities)
- Mobile link Paging Services

Abstract

The aim of 'Fuel Delivery Management System' is to automate its existing manual system by the help of computerized equipment and full-fledge computer software, fulfilling their requirements so that their valuable data can be stored for a longer period with easy accessing and manipulation of the same. Basically, the project describes how to handle good performance and provide better services to clients. This project can lead to an error-free, secure, reliable, and fast management system. This system will help the organization in better utilization of resources.

ABSTRACT

The Bus Ticket Booking Software for Students, Faculty, and Staff is a user-friendly and efficient platform designed to cater to the transportation needs of educational institutions and organizations. With a seamless interface accessible through web and mobile devices, students, faculty, and staff can easily search and reserve bus tickets for daily commute or academic trips. The software also offers real-time bus tracking for increased transparency and reliability. For institutions, administrative tools ensure optimized route planning, bus allocation, and scheduling. Furthermore, the software promotes sustainability by implementing eco-friendly practices. Overall, the software aims to enhance the travel experience, foster efficiency, and contribute to a sustainable future.

For educational institutions and organizations, the software incorporates administrative tools for efficient management. These tools include route planning, bus allocation, and scheduling functionalities, optimizing the utilization of resources and ensuring timely services. It also offers secure payment gateways and ticket verification processes to facilitate secure and hassle-free transactions. Moreover, the Bus Ticket Booking Software promotes sustainability by implementing eco-friendly practices, such as optimizing bus routes to reduce emissions and overall environmental impact.

ABSTRACT

- RTO Management System is a web-based application that facilitates users in applying for a learning license and driving license. This software has been designed to facilitate the flow of information within an organization. RTO provides the facility of applying for licenses online. RTO Management System is a web application, which is very useful for RTO works completion online. Here we developing such type of software that reduces the RTO work manually and helps to save the time of the user.
- The main objective of “RTO Management System” project is to providing easier to RTOs and License holders.

Abstract

The last century has witnessed a rapid increase in the population of the elderly people in developed and industrialized countries. This phenomenon is not restricted to the western world only, but many countries such as ours are now feeling the impact of this transaction. This situation leads to the uncared for elderly people which require extra care and which can be fulfilled by a good environment. So, this web application provides interaction between elderly people and good home shelter (old age home).

ABSTRACT

In manual system we have to maintain car detail, enquiries. In manual system we make four entries for any one transaction in different books. Then we prepare the cash book. And book advantage and disadvantage of manual system is list below:-

Advantage :-

- 1) There is no requirement of power.

Disadvantage:-

- 1) Difficult to maintain accounting and Transaction books.
- 2) Difficult to generate a report.
- 3) It is very much time consuming.
- 4) Difficult to search a record.
- 5) Data may not be perfect human error.

Abstract

The system creates UI based manufacturing system that enables a manufacturing industry to schedule its manufacturing operations based on the daily update of sales from its dealers. Once the sales figures of items for the past week are entered by the dealers over the application along with the orders for the next delivery, the schedule for the next week's production will be drawn up. A report of the required raw materials or parts will be drawn up with the product requirements over the internet & asked to quote their rates.

Once the rates are quoted, the order will be placed with the required delivery schedules. Once the parts are supplied the stocks will be updated. Then a production plan will be drawn up taking the bill of materials into consideration. Once the production plan is approved, the stock will be updated when the material is issued. Once the finished products are available the delivery schedules will be drawn up based on the orders placed by the Dealers. The stocks with the dealers will also be maintained.

The Benefits of the Electronic Product Store is

- It is used as an interactive Application.
- Providing High-Security.
- Easy Business Solutions.

ABSTRACT

The multi-restaurant table booking system is a digital platform designed to streamline the process of making table reservations across multiple restaurants. With the growing popularity of dining out and the increasing number of dining establishments, managing reservations efficiently has become a challenge for both customers and restaurant owners. This abstract highlights the key features and benefits of the multi-restaurant table booking system, emphasizing its potential to enhance the dining experience for customers while optimizing operations for restaurant owners. Moreover, the multi-restaurant table booking system facilitates communication between customers and restaurants, eliminating the need for phone calls and minimizing human errors. It sends automated booking confirmations and reminders to customers, reducing no-shows and optimizing table turnover.

Abstract

In today's scenario computer is an important part day-to-day life. Every individual right from a college student to a business tycoon utilizes the computer to browse the internet to send email, chat, buy products via net etc.

This is inspired and encourages us to develop online website for every individual.

Our project entitled "**Flower And Garland**" is a Flower shop that is designed in such a way that the Client's requirement deals with the available Flowers on website that will enable the client to mobilize its business through buying the different seasonal Flowers in the website. It will enable a customer to have access to online shopping that is the site should be dynamic and more customer centric business procedure , as it can be used by both large scale and small scale business. Thereby, maximizing the profit of the organization.

"FLOWER SHOP" acts as a showcase for the different seasonal Flowers on online shop and providing easy access to customers through login procedure, to interact with the WEBSITE and DATABASE .

ABSTRACT

A portfolio is a collection or showcase of someone's work, achievements, skills, and experiences in a specific field or profession. Portfolio websites are commonly used by individuals ,writers ,photographers ,developers and professionals to present their body of work to potential employers, clients, or collaborators. A portfolio serves as a powerful tool to highlight accomplishments, demonstrate expertise, and showcase creative abilities.

Portfolio website displays the professional background of an individual and brief information about work experiences , education ,skills ,contact details along with various social media links. It allows to create , edit , update their Portfolio along with multiple key features. The website abstract revolves around the notion of building connections. Through seamless user interaction, it aims to foster a sense of connectivity between the visitor and the creator, facilitating a deeper understanding of the individual's passion, skills, and unique perspective.

ABSTRACT

Birth registration is the official recording of a child's birth by the state. The cost of obtaining a birth certificate, risk and stress of communicating with the National Population Commission (NPC) officials, loss of certificate are some of the possible problems of the manual process of obtaining birth certificate. Before a birth certificate is issued by NPC, the birth must be registered.

This system will help in eliminating having paper based certificate, it reduces the stress of communicating with government officials and ultimately saves time.

the implementation of the proposed system is achieved using PHP for programming the interface and HTML, JAVASCRIPT, AJAX, JQUERY for the user interface and MYSQL for the database.

ABSTRACT

The Online shopping portal is mainly useful for who haven't time to go to shopping, those are just entered into this website and bought what ever they want.

Even it is night or morning they entered into this site, and chosen different items like fruits, books, toys etc.

'Customer is our god' mainly this website is based on this formula. After chosen items he bought into Pay pal process like VISA or MASTER credit cards or any Debit cards are accepted in this website. Customer is happily shopping at his rest place.

Once customer entered with his own username and password, at that time automatically one shopping cart will be created, once user select an item it will add to cart. In case user thinks the selected item is not useful for me, then deleted that item from shopping cart.

Customer selected some items, but in his credit or debit cart haven't that much balance, then he was logout from the website, the selected items are stored at cart with specific users with his allotted carts, after some days he bought those items then automatically deleted from the cart.

Abstract

A banquet hall is a room or building for the purpose of hosting a party, banquet, wedding or other reception, or other social event. This invention provides banquet hall booking for managing booked and vacancy status of banquet halls. This paper deals with an aim to develop an online function hall booking system. The main purpose is to build an application program to reduce manual work and track the complete details about the banquet hall. Android Studio software was used for implementing the application. WAMP Server was used as a back end for storing the details of booked halls. PHP was used as an interface for connecting Android Studio and WAMP Server. MySQL was used for writing queries. This application will provide the status of availability of halls, and other necessary details about the halls. Key Words: Android Studio, PHP, MySQL, WAMP Server. In the existing system, the management of banquet hall was carried out by using pen and paper. The customers need to visit each hall before booking, and there was lot of time consumption. The present invention relates to a system of managing reservation and utilization of banquet and halls. This application is used to check the availability of banquet hall. It is inefficient that a banquet hall capable of holding 100 individuals is employed for 20 individuals, as just one quarter or one fifth of the house is enough for twenty individuals, going away the 3 quarters or four fifth of the area unused. Thus, a banquet hall of an explicit size is structured so the halls are often divided into a plurality of smaller areas. Adopting this structure permits a number of teams of guests to at the same time use the banquet hall, thereby increasing the potency of area utility. This application will provide services to the customers at one touch such as location, available dates and amenities rendered, parking layout, catering facilities, managing payment. The work load of the banquet hall supplier is reduced, and quality of the service is enhanced. Banquet Hall Reservation System reduces the manual work of customers. System helps to view halls, book halls, and view details about available halls. Here, there will be Admin, the one that manages the application. Admin will be responsible for managing the work of adding new halls, updating the details of the available halls, the users are the one who book the halls. To book the hall, the user must register by entering the username and password. After the registration, the user can view halls by selecting the desired date and can view the available halls and can book the desired hall. Once the hall is booked, the other customers cannot book it; the booked hall will automatically disappear and will not appear until it is free.

ABSTRACT

The project aims to develop a personal-assistant for Windows-based systems. Its inspiration from virtual assistants like Cortana for Windows, and Siri for iOS. It has been designed to provide a user-friendly interface for carrying out a variety of tasks by employing certain well-defined commands. Users can interact with the assistant through voice commands.

As we know Python is a suitable language for script writers and developers. Let's write a script for Personal Voice Assistant using Python. The query for the assistant can be manipulated as per the user's need.

The implemented assistant can open up the application (if it's installed in the system), search Google, Wikipedia and YouTube about the query, calculate any mathematical question, etc by just giving the voice command. We can process the data as per the need or can add the functionality, depends upon how we code things. We are using Google speech recognition API and google text to speech for voice input and output respectively. Also, for calculating mathematical expression Wolfram Alpha. API can be used.

Abstract

Cloud-based data storage service has drawn increasing interests from both academic and industry in the recent years due to its efficient and low cost management. Since it provides services in an open network, it is urgent for service providers to make use of secure data storage and sharing mechanism to ensure data confidentiality and service user privacy. To protect sensitive data from being compromised, the most widely used method is encryption. However, simply encrypting data (e.g., via AES) cannot fully address the practical need of data management. Besides, an effective access control over download request also needs to be considered so that Economic Denial of Sustainability (EDoS) attacks cannot be launched to hinder users from enjoying service. In this paper, we consider the dual access control, in the context of cloud-based storage, in the sense that we design a control mechanism over both data access and download request without loss of security and efficiency. Two dual access control systems are designed in this paper, where each of them is for a distinct designed setting. The security and experimental analysis for the systems are also presented.

ABSTRACT

A Beauty Parlour is a service-oriented establishment in which women receive treatment to enhance their beauty. Skincare, facial make-up, hair nourishment, and model hair cutting are the most important nourishing activities of a beauty parlour.

The use of machinery, ayurvedic formulations, and approved synthetic chemicals and medicines vary from person to person as per need. In the present project, the provision of different beauty therapy is present with the use of a limited number of machinery. A beauty salon or beauty parlor (International spelling: beauty parlour) (or sometimes beauty shop) is an establishment dealing with cosmetic treatments for men and women.

Other variations of this type of business include hair salons and spas. There is a distinction between a beauty parlour/salon and a hair salon and although many small businesses do offer both sets of treatments; beauty parlours provide more generalized services related to skin health, facial aesthetic, foot care, aromatherapy—even meditation, oxygen therapy, mud baths, and innumerable other services.

ABSTRACT

This document is a review report on the research conducted and the project made in the field of computer engineering to develop a system for driver drowsiness detection to prevent accidents from happening because of driver fatigue and sleepiness. The report proposed the results and solutions on the limited implementation of the various techniques that are introduced in the project. Whereas the implementation of the project give the real world idea of how the system works and what changes can be done in order to improve the utility of the overall system.

Furthermore, the paper states the overview of the observations made by the authors in order to help further optimization in the mentioned field to achieve the utility at a better efficiency for a safer road.

Keywords—Driver drowsiness; eye detection; yawn detection; blink pattern;fatigue

ABSTRACT

The objective of project on Fixtures Furniture is to developing a GUI based automated system, which will cover all the information Related to Furniture Shopping. This project is developed using PHP and MySQL. This simple online store serves some features that are commonly found in other popular online stores. Using this project a user can buy furniture through online services.

In this project, we are using Visual Studio Code to mainly design the front end of the project and the back end is implemented on XAMPP Web Server. Web Server software is used to design back end mainly because we can create relational table employee database system easily; using Web Server and Visual Studio Code software, provide a good graphical user interface to the user of the system.

Abstract

1.1. Scope of The Project The objective of this application is to develop a system that effectively manages all the data related to the various DJ events that take place in a function.

The purpose is to maintain a centralized database of all DJ event related information. The goal is to support various functions and processes necessary to manage the data efficiently.

1.2. Existing System This existing system is not providing secure registration and profile management of all the users properly. This system is not providing on-line Help. This system doesn't provide tracking of users activities and their progress. This manual system gives us very less security for saving data and some data may be lost due to mismanagement. This system is not providing event management through internet. This system is not providing proper events information. The system is giving manual information through the event management executer.

1.3. Proposed System The development of this new system contains the following activities, which try to automate the entire process keeping in the view of database integration approach. This system maintains user's personal, and contact details. This system will provide on line help and search capabilities. User friendliness is provided in the application with various controls provided by system rich user interface. Authentication is provided for this application only registered users can access. DJ event information files can be stored in centralized database which can be maintained by the system. This system provides the users to manage the DJ events systematically.

ABSTRACT

The Student Sanctuary platform is a web-based application developed to address the challenges faced by students in virtual learning environments. It aims to provide a safe and supportive space for students to connect, communicate, and collaborate with each other and their teachers. The platform leverages the power and versatility of the Python programming language and incorporates features such as custom roles, email-based authentication, and real-time chat functionality.

By fostering a sense of community and support among students and teachers, Student Sanctuary aims to combat social isolation and disconnection often experienced in online classrooms. The user-centered design approach ensures that the platform meets the specific needs of its users, while the integration of AWS EC2 allows for scalable and secure infrastructure.

Through Student Sanctuary, students can create unique accounts, access various tools and resources, and engage in real-time communication with their peers and instructors. The platform's custom roles enable administrators to manage access and permissions effectively. With its intuitive interface and emphasis on community-building, Student Sanctuary seeks to enhance the overall learning experience and empower students to succeed both academically and personally.

In summary, the Student Sanctuary platform offers a transformative virtual learning environment, leveraging technology to foster engagement, collaboration, and a sense of belonging. It aims to address the challenges associated with online education, ultimately creating a supportive and inclusive space for students to thrive.

ABSTRACT

A SEEDS OF CHANGE is a transformative online platform that revolutionizes the way individuals, organizations, and causes connect and receive support. It serves as a catalyst for generosity, creating a space where anyone, regardless of their financial means, can contribute and make a positive impact.

The platform emphasizes accessibility, ensuring that giving is not limited by financial constraints. It provides a free and inclusive environment where donors can browse through various causes and contribute any amount, knowing that even the smallest donation can make a significant difference.

Transparency and accountability are integral to the platform. Advanced technology is utilized to verify and monitor donations, ensuring they reach the intended recipients and are used responsibly. Trust and integrity are paramount, fostering confidence in the donation process.

ABSTRACT

The **Bus** Ticket Booking Software for Students, Faculty, and Staff is a user-friendly and efficient platform designed to cater to the transportation needs of educational institutions and organizations. With a seamless interface accessible through web and mobile devices, students, faculty, and staff can easily search and reserve bus tickets for daily commute or academic trips. The software also offers real-time bus tracking for increased transparency and reliability. For institutions, administrative tools ensure optimized route planning, bus allocation, and scheduling. Furthermore, the software promotes sustainability by implementing eco-friendly practices. Overall, the software aims to enhance the travel experience, foster efficiency, and contribute to a sustainable future.

For educational institutions and organizations, the software incorporates administrative tools for efficient management. These tools include route planning, bus allocation, and scheduling functionalities, optimizing the utilization of resources and ensuring timely services. It also offers secure payment gateways and ticket verification processes to facilitate secure and hassle-free transactions. Moreover, the Bus Ticket Booking Software promotes sustainability by implementing eco-friendly practices, such as optimizing bus routes to reduce emissions and overall environmental impact.

ABSTRACT

An **art gallery** is a room or a building in which visual art is displayed. In Western cultures from the mid-15th century, a gallery was any long, narrow covered passage along a wall, first used in the sense of a place for art in the 1590s. The long gallery in Elizabethan and Jacobean houses served many purposes including the display of art. Historically, art is displayed as evidence of status and wealth, and for religious art as objects of ritual or the depiction of narratives. The first galleries were in the palaces of the aristocracy, or in churches. As art collections grew, buildings became dedicated to art, becoming the first art museums.

Among the modern reasons art may be displayed are aesthetic enjoyment, education, historic preservation, or for marketing purposes. The term is used to refer to establishments with distinct social and economic functions, both public and private. Institutions that preserve a permanent collection may be called either "gallery of art" or "museum of art". If the latter, the rooms where art is displayed within the museum building are called galleries. Art galleries that do not maintain a collection are either commercial enterprises for the sale of artworks, or similar spaces operated by art cooperatives or non-profit organizations. As part of the art world, art galleries play an important role in maintaining the network of connections between artists, collectors, and art experts that define fine art.

ABSTRACT

TITLE OF THE PROJECT: "INDIANPIZZA"

As the people today are more inclined towards availing the services through mobile phones because it is the easy and time-saving way of availing services, having a pizza delivery app service is going to be proved highly beneficial for you if you are a pizza outlet owner. With your app, your customers will gain the ease to access your services from their couch only to order their favourite flavour from you. A pizza delivery app can also get you more customers which helps you gaining more enormous profits as well it will make reaching to the customers so much easier through online marketing tools.

ABSTRACT

This project manages people, animal's details and provides ticket to the person who comes to visits in zoo with his/her family. With this project admin is able to see how many people is visiting in zoo and also see how many ticket is generating in particular period.

Zoo Management System is a web based technology which manages peoples, animals details and provides ticket to the person who comes to visits in zoo with his/her family. This web application provides a way to effectively control record & track the people who visit to zoo.

A zoo management system effectively manages and handles all the functioning of a zoo. The software system can store the data of people tickets that came to visit in the zoo. The system also maintains and calculates the price of ticket. The system needs an administrator to input the detail of ticket like how many are adult and how many are child and print the ticket and give it to person.

In this project we use PHP and MySQL database and it has one module i.e. Admin so see how many ticket is generating in particular period.

SINDHI COLLEGE

ABSTRACT

Computers have become a way of life for today's high society. Many aspects of modern life that we have come to accept as common place would not be possible if there were no computers. Today computers are used extensively in many areas of business, industry, science, education etc.

The major advantage of computer is its speed that makes it able to give some useful information very quickly. This speed also opens new approaches to problem solving and data processing. Another feature is its accuracy. Though the computers do only what is instructed at every instant, these instructions are taken into account and accurate information's are produced. Computer can hold data and instruction in an electronic representation in internal memory and this data can be retrieved at any time.

The project entitled "Cyber Cafe Management System" is a software package, which can be used in cyber cafes for managing the clients' computer efficiently. Now a day's cyber terrorism, which is mainly undergone through internet cafes, need to be tackled properly. Thereby, it is indeed necessary to store the valid information of the user who comes for internet access. The system being used, the time at which the user logs in and logs out should be recorded systematically.

In this modern era, a number of people cess the internet frequently by means of cyber cafes. For such frequent users, a prepaid account shall be maintained and discounted rates may be charged from them. While walkthrough users, who are less frequent, are charged a fixed rate. By using the LAN connections in the cyber cafes, we can automate this process very easily This system comprises of the following modules:

- The Server Module
- The Client Module

Definitions

PHP(HYPertext PROCESSOR):-

PHP (Hypertext Processor) is a general-purpose scripting language and interpreter that is freely available and widely used for web development. The language is used primarily for server-side scripting, although it can also be used for command-line scripting and, to a limited degree, desktop applications

HTML(HYPertext MARKUP LANGUAGE):-

HTML (Hypertext Markup Language) is a text-based approach to describing how content contained within an HTML file is structured. This markup tells a web browser how to display text, images and other forms of multimedia on a webpage.

CSS(CASCADING STYLE SHEETS):-

CSS stands for Cascading Style Sheets. CSS describes how HTML elements are to be displayed on screen, paper, or in other media. CSS saves a lot of work. It can control the layout of multiple web pages all at once. External stylesheets are stored in CSS files.

Javascript:-

JavaScript is commonly used for creating web pages. It allows us to add dynamic behavior to the webpage and add special effects to the webpage. On websites, it is mainly used for validation purposes. JavaScript helps us to execute complex actions and also enables the interaction of websites with visitors. Using JavaScript, it is also possible to load the content in a document without reloading the webpage.

1.Introduction

The Car Rental System is being developed for customers so that they can book their vehicles from any part of the world. This application takes information from the customers through filling their details. A customer being registered in the website has the facility to book a vehicle which he requires.

Aims & Objectives

It is a system design especially for large, premium and small car rental business. The car rental system provides complete functionality of listing and booking car. In this system, Tourism and Travelling facilities also provide.

- To produce a web-based system that allow customer to register and reserve car online and for the company to effectively manage their car rental business.
- To ease customer's task whenever they need to rent a car.

Scope for the project Online Car Rental System

This project traverses a lot of areas ranging from business concept to computing field, and required to perform several researches to be able to achieve the project objectives.

Abstract

The Car Rental System is being developed for customers so that they can book their vehicles from any part of the world. This application takes information from the customers through filling their details. A customer being registered in the website has the facility to book a vehicle which he requires.

The proposed system is completely integrated online systems. It automates manual procedure in an effective and efficient way. This automated system facilitates customer and provides to fill up the details according to their requirements. It includes type of vehicle they are trying to hire and location. The purpose of this system is to develop a web site for the people who can book their vehicles along with requirements from any part of the world.

This project is designed so as to be used by Car Rental Company specializing in renting cars to customers. It is an online system through which customers can view available cars, register, view profile and book car.

The MOU is intended to recognize the general basis for a cooperative and collaborative working relationship between the two parties. The purpose of MOU is to ensure optimum involvement of students and faculty of Sindhi College, Bengaluru for mutual intentions to jointly work on projects required for community welfare and to inculcate a sense of service attitude among students. The scope of MOU includes:

1. Academic Resources
2. Teaching -Learning Aids
3. Resource Centre Facilities
4. Training Assistance
5. Skill Enhancement
6. IT Resources
7. Human Resources
8. Collaboration to conduct academic workshops.
9. Skill based training
10. Internship

ADMINISTRATION OF THE MOU

1. The administration of this MOU will be subject to the following conditions and limitations:
 - i. The implementation of any of the programmes or activities envisaged by this MOU shall depend upon the availability of material and financial resources in the institutions concerned.
 - ii. The specific of the programmes and activates shall be designed and carried out by the authorized representatives of Sindhi College, Bengaluru and Machine Elements, Bengaluru.
 - iii. The work performed under this MOU will be reviewed on an annual basis. The meetings will be held in a location and on a day that are convenient to both the institutions.

FOR MACHINE ELEMENTS

PRINCIPAL
SINDHI COLLEGE
#33/2B Kempapura, Hebbal,
Bengaluru - 560 024.

- iv. Each institution to this MOU shall own the intellectual property (IP) conceived and first reduced to practice solely by its employees or agent. Further the intellectual property conceived and reduced to practice through joint efforts of both the institutions shall be shared by both with regard to projects or activities contemplated by this MOU.
- v. Each institution pledges not to use the name of other party or the name of any employee of other institution, in any publicity, advertising or news release without the prior written approval of the institution.

For agreed upon activities, both institutions will make available their facilities and staff. This MOU will take effect on and will be valid for One (1) year from the date noted in the first line of this document unless terminated by one of the parties. Either party may withdraw from this MOU provided written notification of the withdrawal is given to the other party at least three (3) months prior to the desired withdrawal date. This MOU may be renewed for another period of one (1) year upon mutual written consent of the parties before the expiration date. Each institution will have copies of this agreement.

Financials

There is no financial commitment on the part of Sindhi College and Machine Elements to take up any programme mentioned in the MoU. If there is any financial consideration, it will be dealt separately. However, any program stated above organized is for the social benefit and not for the financial benefit. The Common purpose of the letter of understanding is to enhance knowledge pool and augment the Existing resources for the benefit of the various stake holders of the institutions. This letter of understanding is signed on 29th day of April 2023 for the period of one year. MOU is effective from 5th April 2023.

Additions or amendments to the provisions fixed by this Memorandum of Understanding are possible at any time, subject to consultation and agreement between both parties.

In witness whereof the parties hereto cause this instrument to be executed as of the date, month and year indicated below.

COMPLETION OF INTERNSHIP

This is to certify that Hafeez Ur Rahman ER, a student of Sindhi College, Kempapura (Hebbal) - Education Program: M Com (FA) Final Year, has successfully completed a '30 hours internship' at Machine Elements under my supervision from 03/07/2023 to 08/07/2023

During this tenure with us, he learnt about the concepts of Indian Income Tax structures, the different slabs, Old v/s new regime, various tax incentive & investment schemes.

He was also briefed about concepts like TDS, Sales Return, Professional Tax, E-way bills, Credit and Debit notes and thresholds for various taxes.

During the internship period, Hafeez Ur Rahman ER has shown a remarkable ability to learn quickly and take on challenging tasks. He has also demonstrated good communication skills, both written and verbal.

I would like to acknowledge his dedication and commitment during his internship with us.

I am confident that Hafeez Ur Rahman ER will be an asset to any organization he chooses to work with.

It is my pleasure to issue this letter of completion to Mr. Hafeez Ur Rahman ER, and I wish him all the best for his future endeavours.

Sincerely,

For MACHINE ELEMENTS

He was also briefed about concepts like TDS, Sales Return, Professional Tax, E-way bills, Credit and Debit notes and thresholds for various taxes.

During the internship period, Manoj has shown a remarkable ability to learn quickly and take on challenging tasks. He has also demonstrated good communication skills, both written and verbal.

I would like to acknowledge his dedication and commitment during his internship with us.

I am confident that Manoj will be an asset to any organization he chooses to work with.

It is my pleasure to issue this letter of completion to Mr. Manoj Kumar R, and I wish him all the best for his future endeavors.

Sincerely,

Siddarth Asrani

Sindhi College

(Hereinafter referred to as Sindhi College)

Hebbal, Kempapura, Bengaluru, Karnataka 560024

The MOU is intended to recognize the general basis for a cooperative and collaborative working relationship between the two parties. The purpose of MOU is to ensure optimum involvement of students and faculty of Sindhi College, Bengaluru for mutual intentions to jointly work on projects required for community welfare and to inculcate a sense of service attitude among students. The scope of MOU includes:

1. Academic Resources
2. Teaching -Learning Aids
3. Resource Centre Facilities
4. Training Assistance
5. Skill Enhancement
6. IT Resources
7. Human Resources
8. Collaboration to conduct academic workshops.
9. Skill based training
10. Internship

ADMINISTRATION OF THE MOU

1. The administration of this MOU will be subject to the following conditions and limitations:
 - i. The implementation of any of the programmes or activities envisaged by this MOU shall depend upon the availability of material and financial resources in the institutions concerned.
 - ii. The specific of the programmes and activates shall be designed and carried out by the authorized representatives of Sindhi College, Bengaluru and Sri Maruti Concrete Products, Bengaluru.
 - iii. The work performed under this MOU will be reviewed on an annual basis. The meetings will be held in a location and on a day that are convenient to both the institutions.
 - iv. Each institution to this MOU shall own the intellectual property (IP) conceived and first reduced to practice solely by its employees or agent. Further the

intellectual property conceived and reduced to practice through joint efforts of both the institutions shall be shared by both with regard to projects or activities contemplated by this MOU.

- v. Each institution pledges not to use the name of other party or the name of any employee of other institution, in any publicity, advertising or news release without the prior written approval of the institution.

For agreed upon activities, both institutions will make available their facilities and staff. This MOU will take effect on and will be valid for One (1) year from the date noted in the first line of this document unless terminated by one of the parties. Either party may withdraw from this MOU provided written notification of the withdrawal is given to the other party at least three (3) months prior to the desired withdrawal date. This MOU may be renewed for another period of one (1) year upon mutual written consent of the parties before the expiration date. Each institution will have copies of this agreement.

Financials

There is no financial commitment on the part of Sindhi College and Sri Maruti Concrete Products to take up any programme mentioned in the MoU. If there is any financial consideration, it will be dealt separately. However, any program stated above organized is for the social benefit and not for the financial benefit. The Common purpose of the letter of understanding is to enhance knowledge pool and augment the Existing resources for the benefit of the various stake holders of the institutions. This letter of understanding is signed on 28th day of June for the period of two years. MOU is effective from 5th April 2023 .

Additions or amendments to the provisions fixed by this Memorandum of Understanding are possible at any time, subject to consultation and agreement between both parties.

In witness whereof the parties hereto cause this instrument to be executed as of the date, month and year indicated below.

The MOU is intended to recognize the general basis for a cooperative and collaborative working relationship between the two parties. The purpose of MOU is to ensure optimum involvement of students and faculty of Sindhi College, Bengaluru for mutual intentions to jointly work on projects required for community welfare and to inculcate a sense of service attitude among students. The scope of MOU includes:

1. Academic Resources
2. Teaching -Learning Aids
3. Resource Centre Facilities
4. Training Assistance
5. Skill Enhancement
6. IT Resources
7. Human Resources
8. Collaboration to conduct academic workshops
9. Skill-based training
10. Internship

ADMINISTRATION OF THE MOU

1. The administration of this MOU will be subject to the following conditions and limitations:
 - i. The implementation of any of the programmes or activities envisaged by this MOU shall depend upon the availability of material and financial resources in the institutions concerned.
 - ii. The specific programmes and activities shall be designed and carried out by the authorized representatives of Sindhi College, Bengaluru and SS Auditors & Consultants, Bengaluru.
 - iii. Each institution to this MOU shall own the intellectual property (IP) conceived and first reduced to practice solely by its employees or agent. Further, the intellectual property conceived and reduced to practice through joint efforts of both institutions shall be shared by both with regard to projects or activities contemplated by this MOU.
 - iv. Each institution pledges not to use the name of the other party or the name of any employee of the other institution, in any publicity, advertising or news release without the prior written approval of the institution.

PRINCIPAL
SINDHI COLLEGE
A. B. Kempapura, Hebbal,

For agreed-upon activities, both institutions will make available their facilities and staff. This MOU will take effect on and will be valid for One (1) month from the date noted in the first line of this document unless terminated by one of the parties. Each institution will have copies of this agreement.

Financials

There is no financial commitment on the part of Sindhi College and SS Auditors & Consultants to take up any programme mentioned in the MoU. If there is any financial consideration, it will be dealt with separately. However, any program stated above organized is for social benefit and not for financial benefit. The Common purpose of the letter of understanding is to enhance the knowledge pool and augment the existing resources for the benefit of the various stakeholders of the institutions. This letter of understanding is signed on the 6th day of November 2023 for the period of One month. MOU is effective from 1st November 2023.

Additions or amendments to the provisions fixed by this Memorandum of Understanding are possible at any time, subject to consultation and agreement between both parties.
